# PALMALife ®MR

PALMALIFE® Rumen bypass fat.

## GUARANTEE ANALYSIS

FAT: Minimum 83.50%
CALCIUM: Maximun 9.00%
MOISTURE: Maximum 5.00%

**INGREDIENTS:** Palm fatty acids, Calcium hydroxide and Hydroxyethylated Toluene as an antioxidant.

**PALMALIFE** Is a palm fatty acid bypass fat with a rich content of palmitic acid, indispensable to the animal´s nutrition and milk production, since it increases the amount of energy in its diet. Due to its neutral structure it is not digestible by the rumen, however, when it reaches the abomasums, where the PH is acid, it´s easily absorbed by the intestine.

## SUGGESTED DOSE

| | |
|---|---|
| Cattle | 200-500g per day per cow |
| Sheep | 50-200g per day per sheep |
| Goats | 100g per day per goat |
| Swine | 2% of daily ration |

**ENERGY VALUES:** Net lactation energy: 6 Mcal / kg

## ANALYTICAL METHODS

| | |
|---|---|
| Total fatty acids | NMX-Y-335-SCFI-2004 |
| Calcium | NMX-Y-021-SCFI-2003 |
| Moisture | NMX-116-SSA1-1994 |
| Ashes | NMX-K-304-1972 |
| Digestible Energy | Nutrion Software Method for calculating results |
| Net breastfeeding energy | Nutrion Software Method for calculating results |

**CAUTION:** Store in a dry and well ventilated area, protected from rodents and insects. Do not use the food with mold or infested with insects in the feeding of cattle, this can cause illness, decrease in performance or even the death of the animal.

**PRODUCT LIFE:** 12 months after manufacturing.

**WARNING:** It should not be used as the only source of nourishment at any feeding stage of the animal.
